# Dreer's Wholesale Price List

SEPTEMBER—1920—DECEMBER

**W**E offer in this our Autumn Wholesale Catalogue a very complete line of Bulbs, Plants, Seed and Sundries. In the case of Bulbs, the crop is reported as somewhat short on high-grade stock with a very heavy demand. All orders received for stock not actually in hand are booked subject to arrival of our full supply, and owing to the constantly increasing cost of production, freights and other expenses, we are compelled to reserve the right to advance prices without notice.

## Dreer's Mixed Dutch Hyacinths

We offer two grades of mixtures—our "Rainbow" and "Popular" Both are good, and we feel confident that nothing better can be had at the prices quoted. We recommend the single-flowering sorts as giving the best and most uniform results.

### Dreer's "Rainbow" Mixtures of Dutch Hyacinths

These mixtures are made by ourselves out of high grade named sorts, the bulbs measuring 6½ inches and over in circumference. They are well adapted for growing in pots or for high-class bedding and are without doubt the highest grade of mixed Hyacinths offered at a reasonable price.

**SINGLE.** Dark Red, Rose, Pure White, Blush White, Dark Blue, Light Blue, Yellow, or all mixed colors.  
80 cts. per doz.; \$5.75 per 100; \$55.00 per 1000.

**DOUBLE.** Dark Red, Rose, Pure White, Blush White, Dark Blue, Light Blue, Yellow, or all colors mixed.  
80 cts. per doz.; \$5.75 per 100; \$55.00 per 1000.

### Dreer's "Popular" Mixtures of Dutch Hyacinths

This is the regular standard grade imported in mixture from thoroughly reliable growers, the bulbs measure about 6 inches in circumference and are very satisfactory for out-door planting, but are not recommended for forcing.

**SINGLE.** Dark Red, Rose, Pure White, Blush White, Dark Blue, Light Blue, Yellow, or all colors mixed.  
65 cts. per doz.; \$4.50 per 100; \$40.00 per 1000.

**DOUBLE.** Red, White, Blue, Yellow, or all colors mixed.  
65 cts. per doz.; \$4.50 per 100; \$40.00 per 1000.

DOUBLE VAN SION NARCISSUS

### Double Narcissus

Per 100 Per 1000

**Van Sion** (*Telemonius Plenus*). The famous Old Dutch Daffodil; flowers golden yellow. Used in enormous quantities for forcing; also excellent for bedding in conjunction with Hyacinths, flowering at the same time.

**Extra large selected double nose bulbs.** Each bulb will produce at least two flowers and frequently three or more . . . . . \$6 00 \$54 00

**Large selected single nose bulbs.** Each bulb will produce at least one fine flower, often two . . . . . 4 25 38 00

### Jonquils

Very popular flowers on account of their easy cultivation and delightfully fragrant golden yellow blooms. They can be readily forced in the house or planted in the open ground for early flowering.

### Poet's and Poetaz Narcissus

This is the old-fashioned favorite type with white flowers, the cups margined with red and with rich, spicy odor. For indoor culture the King Edward VII and Ornatus are best. The Poetaz varieties are also of exceptional value for forcing.

**Poetaz Irene**. Pale yellow perianth with deep golden cup . . . . . 4 75 42 00

**Poetaz Triumph**. White perianth, cup deep yellow, very large flowers . . . . . 4 75 42 00

**Strong bulbs** . . . . . 2 50 20 00

**Double nose bulbs** . . . . . 3 50 32 00

**Poeticus King Edward VII** (*Almira*). An improvement on *Ornatus*, being a stronger grower, producing larger flowers of purest white with yellow cup margined with scarlet; very early . . . . . 5 50 52 00

### New Giant-flowered Althea

#### WILLIAM R. SMITH

Everyone will be pleased with this splendid new variety; one of our own introductions named in honor of the late William R. Smith, who for over a half century was superintendent of the Botanical Gardens at Washington, D. C.

The habit of the plant is ideal, naturally forming attractive, symmetrical, bushy specimens, while the glistening pure white flowers are of giant size compared to all other sorts, being fully 4 inches in diameter under ordinary cultivation, and open out flat or salver-shaped quite different from the older types which only partially expand; these large, showy flowers are produced in great profusion from early in July until late in September, and are very conspicuous at a period when comparatively few Shrubs are in bloom.

Three-year-old field grown plants, 18 to 24 inches high.

### **Adiantum Farleyense Gloriosum.**

#### **The Glory Fern.**

This splendid Fern which so closely resembles *Adiantum Farleyense* in appearance and which does not require the special skill and care in growing that is necessary to produce good plants of *A. Farleyense*, has quickly made a place for itself, not only on account of the fact that it can be produced for little over half that of growing *Farleyense*, but also because either in a cut state or as plants used in decorative work, it will outlast the old variety ten to one, making it an available subject where *Farleyense* can not be used at all.

2 1/4-inch pots at \$2.00 per doz.; \$15.00 per 100.  
 3-inch pots at \$3.00 per doz.; \$25.00 per 100.

Aureum* and is similar in habit of growth to its parent, producing on well-grown plants fronds from 2 to 3 feet long, on which all of the pinnæ is beautifully fringed or lacinated; entirely distinct from all other varieties. It makes a handsome specimen grown either in a pot or a hanging-basket. We offer plants grown from spores, which while varying from the type as sent out originally is a very desirable form.

(Double Flowering Baby's Breath).

Ready in November.

We are pleased to be again in a position to offer this valuable double-flowered form of "Baby's Breath" in quantity. This plant has been practically unobtainable during the past few years.

Its double white rosette-like flowers, which are produced in great spreading panicles, make it a far more effective subject than the ordinary form, both as a cut flower as well as decorative subject for the garden. As a cut flower it is not only valuable for immediate use, but can be dried and retains its beauty for many months.

We offer for delivery in November strong plants which will produce an abundance of flowers next summer at \$3.50 per doz.; \$25.00 per 100; \$200.00 per 1000.

## Two Great Iris Germanica

### In Golden Yellow and Royal Purple

**"Sherwin-Wright"** (*Golden Yellow*). In this grand novelty we have what has long been wanted, a good vigorous growing, free-flowering, golden yellow Iris Germanica, the few yellow sorts now in commerce being deficient in these important characteristics. The plants grow about two feet high; the flowers which are produced in lavish profusion are of splendid texture and stand well above the foliage, and are of a rich golden yellow without markings or shadings. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Atropurpurea** (*Royal Purple*). A splendid large, very free flowering, pure, rich royal-purple without the slightest shadings, a splendid companion to plant with Sherwin-Wright, the rich purple of Atropurpurea with the golden yellow of Sherwin-Wright forming a beautiful color combination. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

## New Varieties of Iris Germanica.

**King of Iris.** Standards clear lemon-yellow; falls deep satiny brown with a broad border of golden-yellow.

**Lohengrin.** Of gigantic size, deep violet-mauve.

**Loreley.** Perfect shaped flowers, the falls of a deep ultramarine-blue, more or less veined with creamy-white and sulphur-yellow border, the standards are of a pale sulphur-yellow, making a pleasing contrast.

### Iris Interregna.

An interesting new type, the result of crossing *I. germanica* with *I. pumila hybrida*. They bloom earlier than the Germanica Iris, and the flowers combine perfection of form with large size and clear and decided colors. The foliage is dwarf, and maintains its freshness throughout the season. The flower stems are almost 18 inches high, holding the flowers well above the foliage.

**Helge.** Light citron, with pearl-colored centre.

**Ingeborg.** Pure white; flowers 5 inches deep, with petals 2 inches wide. A grand flower.

**Spectabilis.** Rich, free flowering violet-purple.

We aim to confine our list of Sweet Peas to the very best varieties and only those which can be used by florists for cutting. We have added a number of the choicest new varieties of the Spencer type to our list this season.

**Orchid-flowered or Spencer Sweet Peas.**

This type is distinguished from the grandiflora sorts by the extraordinary size of their flowers and by the standard being crinkled and wavy. They usually bear four blossoms on a stem, and are as easy to grow as the commonest sorts. Owing to their being shy seeders, they will always be higher in price than the grandifloras.
